

## Top Quality Vacuum Equipment **COMBO VAC**

Built for the rugged conditions of the oil and gas industry, this **11 m<sup>3</sup> Debris/4 m<sup>3</sup> Water - Combo Vac Unit** delivers powerful suction, superior wash capability, and dependable performance in all seasons.

Designed and constructed in full compliance with **Transport Canada CSA B620, TC407/412**, it combines proven reliability with modern efficiency to keep your operation moving — safely, cleanly, and on schedule.

At its core, the unit comes standard with a **1600 CFM Positive Displacement Rotary blower. An optional 2780 CFM blower is also available. A CAT 660 Triplex wash pump, delivering 10 GPM at 3000 PSI** for high-performance debris recovery and wash-down in the toughest conditions. An optional Cat 3560 is also available which offers **20 GPM at 3000 PSI.**

The rear product valves, isolation valve, water drain valve, and upper and lower water feed hardlines are all **glycol-heated to ensure safe, reliable operation during winter conditions.**

Every detail is built for the field — our **Hotshot 980,000 BTU/hour heater** is housed in our **in house built all aluminum well-lit wash cabinet.** It provides safe access to our 3 hydraulic hose reels and easily accessed controls. A **full-opening hydraulic rear door, 3-stage hoist cylinder, and vibrator system** ensure fast, complete offloading and reduced downtime.

It's Custom Vac "in house" manufactured Aluminum 40" Crossover cabinet (a **60" cabinet is also available upon request**), **two-tone paint finish, heavy-duty subframe**, and field-proven hydraulic and electrical systems, this Debris Combo Vac Unit is built to handle the harshest climates and the most demanding worksites — day after day, job after job.
