

Top Quality Vacuum Equipment **PONY TRAILER**

Purpose-built for industrial vacuum and transport applications, the **Pony Trailer** delivers proven performance, reliability, and safety in demanding operating environments.

Constructed to **Transport Canada CSA B620- TC407/412** standards, it offers the durability and compliance required for the demanding service operations.

The unit features a **16 m³** debris tank with a **full-opening hydraulic rear door, three-stage hoist cylinder, and hydraulic vibrator** for fast, efficient unloading. All **product and drain valves** are **air-actuated and glycol-heated**, ensuring dependable performance in extreme temperatures. A **6" vacuum plumbing system** with **composite loop hose** and **Victaulic fittings** provides unrestricted flow and reduced maintenance.

Mounted on a **heavy-duty purpose-built trailer with air-ride suspension, 2S1M ABS braking, and 11R24.5 tires**, the Pony Trailer delivers stability, control, and long-term structural integrity. Integrated **LED lighting, hose trays, and mid-frame tool box** enhance field efficiency and operator safety. Built for rugged duty and long service life, the Pony Trailer is engineered to perform—**job after job, season after season.**
