

Top Quality Vacuum Equipment **SEMI VAC**

Built for high-performance industrial cleanup, this 30 m³ Semi Vac Unit is engineered for durability, safety, and efficiency in demanding environments.

Fully compliant with **Transport Canada CSA B620, TC407/412**, it delivers powerful vacuum capability and reliable offloading performance to keep operations running smoothly.

At its core, the unit features a **Positive displacement blower** rated at **1600 CFM** with a max vacuum of **27" Hg**. A **320" 6-stage hydraulic dump cylinder**, full-opening rear door, and dual hydraulic vibrators ensure fast, complete discharge and reduced downtime.

All rear valves (two 6" and one 4") are **heated, air-actuated**, and equipped with flip-style controls for winter-ready operation. The tank is constructed with removable baffles, recessed level indicators, and a top-mounted ASME cleanout.

A heavy-duty heated **fitting box** and a steel **tool box** are installed mid frame on the driver side. Two slide out style **chain hangers** are standard and install mid frame on the passenger side.

With its rugged steel frame, aluminum hose trays, and field-proven hydraulic and electrical systems, this Semi Vac Unit is built to perform — job after job, season season.
