

Top Quality Vacuum Equipment

822 HYDRO VAC

c/w Boom

Engineered for versatile excavation and cleanup, this **13 m³ Tri-Axle Hydro Vac** Unit is built for performance in Dangerous goods operations.

With 9 m³ debris and 4 m³ water capacity, it features a Hibon 822 blower rated at 2730 CFM and 27" Hg max vacuum, powered by a Namco transfer case.

A hydraulically operated full opening rear door, 2-6" and 1-4" Betts pneumatically operated discharge valves ensure efficient material handling. The 8" hydraulic boom offers 270° rotation and wireless remote control for precise digging.

The wash system includes a Cat 3560 triplex pump (20 GPM @ 4000 PSI), Hotshot 980,000 BTU heater, and stainless steel glycol tank with air blowdown. Heated valves, insulated wash cabinet, and hydraulic hose reels that support cold-weather operation.

Debris and water tanks feature recessed level indicators, hydraulic hoist, and heated plumbing. Safety features include tank safety post, fire extinguisher, and ground cable. The unit is finished with a sandblasted, primed, and painted body, checker plate decking, and full-length hose trays.

Designed for rugged field conditions, the unit's heated valves, insulated wash cabinet, and poly dig tubes ensure reliable year-round operation. Safety and accessibility are prioritized with a drivers side catwalks with handrails, rear door and rear valve controls are mounted on the rear drivers deck for safe "pit dump" operation. The full-length checker plate decking, slide-out chain hangers, and steel toolbox provide organized storage and durability. Finished with a custom paint job and internal lining in the water compartment, this Hydro Vac is built to perform and last.
